

Qwest Forensics offers an effective intelligence service to safeguard your business in the compliance-led and increasingly digitalised commercial world.

Not all commercial transactions go according to plan and can result in financial and reputational loss if the counterparty fails to meet their obligations or fraud or other criminal activity is involved.

Qwest Forensics offers services ranging from investigation of a counterparty's standing prior to fixing to asset tracing, debt recovery and cyber and IT forensics where loss has been incurred.

Key features

- High quality advice from former law enforcement officers experienced in undercover operations, marine professionals and trained financial and cyber experts who understand your problem.
- Available around the clock from our global network.
